Antoine Pouillaude

Résumé

38 Avenue des 2 Charentes Chaniers, 17610 № 033675468528 ⋈ antoine@antoinep.io ☐ antoinep.io Drivers license

Computer engineering student, looking for a 6-month internship which will be my last training period before graduating in February 2016. Interested in cryptology, web applications, computer systems and networks. Curious, motivated and dedicated. Have the French and Canadian citizenships.

Education

Feb. 2011- **Diplôme d'ingénieur en Informatique**, (5-year Engineering degree in computer science).

Present Université de Technologie de Compiègne, Compiègne (FRANCE).

Degree expected in February 2016

Sept. 2014– Exchange semester studying Computer Science MSc..

Dec. 2014 University of Rhode Island, Kingston, RI (USA).

Sept. 2010– Classe Préparatoire, (6 months of preparation program for competitive exams).

Feb. 2011 Lycée Michel de Montaigne, Bordeaux (FRANCE).

Jun. 2010 **Baccalauréat Scientifique**, (French secondary diploma, with emphasis in mathematics). Lycée Bernard Palissy, Saintes (FRANCE).

Experience

Professional Experience

Jan. 2015– Computer Technician, GROUPE NVL, Angoulême, FRANCE.

Feb. 2015 In charge of setting up a SIEM (Security Information and Event Management) system on their network. I had to study systems from different providers and suggest a solution. We decided to use an open source system (OSSIM).

Feb. 2014– Assistant engineer intern, METADOT CORPORATION, Austin, TX USA.

Jul. 2014 Developping the porting of an application on Android using a RESTful API. Developping a web application using AngularJs framework.

Projects

Sept. 2013- Distributed Music Quiz, DISTRIBUTED ALGORITHM CLASS.

Feb. 2014 Université de Technologie de Compiègne.

In a group of 5 students we found a good game to be implemented between several moving vehicles. We chose to design a music quiz that needs two players found amongst the set of cars.

Feb. 2013- Database design and management, Database Designing Class.

Jun. 2013 Université de Technologie de Compiègne.

Students in group of 34 designed a database that complied with given specifications. Afterward, we had to create a PHP interface to manage our database.

Feb. 2013- Note Manager, ORIENTED OBJECT PROGRAMING CLASS.

Jun. 2013 Université de Technologie de Compiègne.

Students working in pairs were asked to design and program, from scratch, a software that can manage notes (text and media files).

Skills

Computer skills

Basic Ruby on Rails, LATEX, Perl, PHP, CSS

Intermediate Python, Mathematica, Lisp, MASM, AngularJS, Javascript, HTML/XML, Go, SQL, Bash

Advanced C/C++, Qt Framework, Java, Android Framework, Ruby

Operational on Linux, Mac OSX, Windows

Languages

French Mothertongue

English Advanced Conversationally fluent, TOEFL: 104, Spent 1 year in the USA

Spanish Intermediate Common words and phrases

Chinese Notion Basic words

Miscellaneous

Hobbies Pilot of single-engine planes (Robin DR400), Pilot's license obtained in 2009

11 years of practicing piano

Sports 12 years of practice of swimming

Tennis and Badminton

Associations Treasurer of the association FabLab'UTC, Université de Technologie de Compiègne
